

22nd June, 2012

Dear Dr. Sheebu,

I am here to express my feelings the way and manner we were received in this hospital the first day we stepped into this hospital. It shows me that something better will come out of it.

The first day we came here, the condition of my mother-in-law was not giving us joy but you kept on encouraging us that we should not worry ourselves, by the time we finished staying here 21 days that we will see some changes, and that is exactly how it happens.

Earnestly, what impressed me most is the standard of love, kindness and caring we received from the staff. Every minute, seconds and hours they are always devoted to their work.

In fact, my mother-in-law inability to remember something or walk automatically change for better.

I strongly believe that the hospital Doctors and the staff will continue the same manner they attended us.

— THANKS

Mrs Betty Ibeagwa
